

Take your product from concept to reality with ease in APT trays. Available in a wide variety of sizes and configurations, our trays are able to withstand temperatures from 40°C up to 204°C. APT trays allow you to fill, cook, distribute and sell product all in the same vessel, eliminating hard pans, introducing greater operating efficiencies and lowering manufacturing costs. A patented blend of CPET keeps food safer and lasting longer due to good barrier quality and ability to be fully sealed with a wide range of commercial films. With complete BRC approval, excellent visual appearance and some of the best low temperature breakage specs in the business, APT trays are preferred by the top food producers in the world. Affordable trays that outperform all the alternatives? Why not? Start shipping your product in APT trays today.
